

VERICANT

Web Developer

Location: Beijing

Reports to: Team Tech Leader

About Vericant:

Vericant partners with US schools/colleges to identify best-fit Chinese applicants via verified video interviews, proctored writing samples, and spoken English evaluation.

One of Vericant's core advantages is the technology that we've built so far and we're looking for those who want to join and help continue to pave the way in this industry.

If you're interested in making a direct impact by working in a small and focused team in a high-paced startup environment, then you'll fit right in.

Job Responsibilities:

- Front-end and back-end web development of various core products that target Chinese and/or International users
- Maintenance and fixes of bugs / live issues
- Ad hoc tech support for all Vericant teams (incl Product, Sales, CRM, Ops, etc.)

Essential Skills:

- 2+ years web development experience
- A solid understanding of web application development processes and the entire stack, from the layout/user interface to relational database structures.
- Ability to work in a fast paced, dynamic, team-oriented environment
- Highly motivated & self-disciplined
- Good analytical and problem solving skills
- Strong communication and interpersonal skills

Desired Skills:

- 2+ years of Python + Django
- B.A. in Computer Science (or related field)
- High level of computer proficiency
- Familiarity with Agile methodologies
- Strong organization skills to manage multiple timelines and complete tasks quickly
